### **DETAILED ACTION**

1. The Examiner has carefully considered Applicant's amendment and accompanying remarks filed March 22, 2004. All rejections have been overcome.

#### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 22, 2004 has been entered.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mary Jo Redman on May 24, 2004.

The application has been amended as follows:

**\*\*Cancel claims 12-18**

**\*\*Amend claim 19 as follows:**

Art Unit: 1771

19. (Currently Amended) In combination: a structure that includes a wall having a surface; and a composite coating adhering to said surface of said wall for increasing the resistance to explosion forces of said structure; comprising:

a first layer [;] comprising [;] an elastomer in intimate contact with and adhering permanently to said surface of said wall;

a second layer [;] comprising [;] an elastomer in intimate contact with and adhering permanently to said first layer; and

textile embedded between said first and second layers[;], wherein said elastomer is the product of a fluid precursor that cures in ambient conditions to form said elastomer[;], and wherein said composite coating functions to increase the apparent ductility and elongation of the wall when sudden lateral or explosive force is applied to the structure, wherein said fluid precursor is a two-component formulation the reacts upon mixing to become an elastomer.

#### ***Reasons for Allowance***

4. Claims 19 and 21-27 are allowed.

5. The following is an examiner's statement of reasons for allowance: the rejections in view of Pileggi et al. (US 5,488,912) have been overcome by Applicant's response and the present Examiner's amendment. While Pileggi et al. is believed to be the closest prior art, it fails to teach or suggest a structure that includes a wall having a surface and a first and second elastomeric layer of fluid precursor having a two component formulation wherein the first layers is in intimate contact with and adheres permanently to the surface of the wall.

Art Unit: 1771

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
